Summary

- **3+ years** driving data into business outcomes, and published ML research (IEEE CLICK2026).
- Driven by ambiguous, high-stakes problems at the intersection of AI and business strategy, leveraging data, cross-functional collaboration, and rapid skill-building to deliver measurable impact at scale.

Education

California Baptist University

Riverside, California 08/2025 - 08/2026

Master of Business Administration, Major: Management/Business Analytics. GPA: 3.85/4.

Key Coursework - Risk Management, Business Operations & Logistics, Marketing Analytics, Business Intelligence, Data Visualization, Financial Management

Madras Christian College

Chennai, India 09/2024 - 01/2025

Diploma, Digital Marketing

Key Coursework – Marketing Strategy, SEO Optimization, Paid Promos, Social Media Marketing.

The American College

Madurai, India 07/2018 - 04/2022

Bachelor of Arts, Major: Economics

Key Coursework – Micro & Macro Economics, Statistics, Mathematical Economics, Public Finance, International Economics, Industrial Organization.

Work Experience

California Baptist University

06/2023 - 07/2025

Student Service Assistant,

Private University Serving **11,000+** Students on Campus in **Riverside, California.**

- Accomplished a **35% lift in track impressions across 120+ audio tracks**, as measured by **Google Ads and SEMrush keyword performance metrics**, by leading cross-functional brand KPI analysis, including streaming volume, demographic reach, and listener engagement — across Spotify, Apple Music, YouTube Music, and Amazon Music.
- Accomplished **Spotify Indian Local Chart placements for 7 of 120+ tracks**, as measured by **chart-tracking dashboards**, by executing targeted **playlist pitching** and **paid promotional campaigns across DSPs**.

SAREGAMA INDIA

06/2023 - 07/2025

Content Provider /Creator

India's leading music label **holding 160,000+ records** and one of the world's largest catalogs of Indian music located in **Chennai, India.**

- Accomplished a **35% lift in track impressions across 120+ audio tracks**, as measured by **Google Ads and SEMrush keyword performance metrics**, by leading cross-functional brand KPI analysis, including streaming volume, demographic reach, and listener engagement — across Spotify, Apple Music, YouTube Music, and Amazon Music.
- Accomplished **Spotify Indian Local Chart placements for 7 of 120+ tracks**, as measured by **chart-tracking dashboards**, by executing targeted **playlist pitching** and **paid promotional campaigns across DSPs**.

Rayappan Productions

06/2022 - 12/2023

Distribution Coordinator (A&R) – Marketing & Analytics

Independent record label and digital distribution company in **Chennai, India**

- **Managed royalty operations for 73 artists**, as measured by the accurate and timely distribution of **\$780,000+ annually**, by reconciling DSP revenue reports, auditing streaming data, and maintaining royalty accounting records in Excel.
- **Increased first-week streams by 18% on average**, as measured by pre- and post-test stream velocity across **15+ releases**, by designing and **executing A/B tests on promotional creative and release timing windows**.
- **Scaled catalog distribution to 250+ releases across 15+ DSP platforms**, as measured by zero metadata rejection rate across all submitted releases, by overseeing compliance standards, coordinating digital delivery pipelines, and monitoring catalog performance.

Research Projects

Red Bull Marketing Analysis

03/2026 - Current

Data-driven brand performance and revenue forecasting study using Python Pandas, SQL and machine learning forecasting techniques

- Accomplished revenue forecasting from **\$12.68B to \$19.67B (9.2% CAGR through 2030)**, as measured by model performance across holdout validation sets, by building an ensemble forecasting framework using **Polynomial Regression, Gradient Boosting, and Exponential Trend models in Python**.
- Delivered data-driven marketing investment recommendations, as measured by a projected **\$27.84B** cumulative marketing budget and optimized channel allocation strategy, by **analyzing financial, sales, and Google Trends data using Python Pandas, SQL and machine learning forecasting techniques**.

FinTech ML Model – IEEE Conference Paper

08/2025 - 04/2026

Fraud detection research using ensemble ML on 189,000+ financial transaction records

- Identified actionable managerial insights for financial inclusion strategies, as measured by the **identification of AI personalization ($\beta=0.412$), trust ($\beta=0.358$), and digital literacy ($\beta=0.334$)** as key adoption drivers, by **analyzing data from 2,340 respondents using SEM and Bayesian analytics**.
- Accomplished a **7.0–8.5% AUC improvement over prior research benchmarks**, as measured by model evaluation on **189,000+ financial transaction records**, by developing an ensemble ML framework combining **Random Forest, XGBoost, and LSTM models** — published at the **IEEE CLICK2026 Conference**.

Skills

Programming: Python, R, SQL

Data Analytics & Visualization: Excel (Pivot Tables, Power Query), Tableau, Pandas, GitHub, VS Code
